Sekou The Hunter

*This book is dedicated to Robert Hanssen, traitor to the United States of America and KGB spy. In 1985, Robert Hanssen gave the author's invention, the Defense Oriented Inertial Guidance System (DOIGS), to Russia's KGB enabling them to develop the world class S-400 ABM system. Mr. Hanssen was paid a fortune (over \$100 million) by Russia to terrorize the author from 1985 through 2000 and to make sure he did not become a physicist or a scientist. The FBI never discovered him because he was already being paid by the people of the United States to terrorize the author and to make sure he would never do well in academics. The FSB brought this traitor back into their fold in 1999 to make sure the author, his wife and his child would die in the World Trade Center on September 11, 2001. The traitor Hanssen suddenly died in 2023 after the author revealed his treachery to the US Army. **The author can assure everyone in America that Mr. Hanssen committed the greatest espionage act in American history, far greater than the Rosenbergs.***

Table of Contents

Introduction	6
Chapter 1: S-400 Weapon System	10
Chapter 2: Global Warming	12
Chapter 3: Domestic Tranquility	15
Chapter 4: Religious Freedom	21
Chapter 5: The Crack Spread and Women's Liberation	27
Chapter 6: Homosexuality and Lesbianism	33
Chapter 7: Divorce	34
Chapter 8: Health Care	40
Chapter 9: Education	44
Chapter 10: The Elderly	50
Chapter 11: Freedom	53
Chapter 12: Art	57
Chapter 13: Conclusion	61

Introduction

I started writing this book over two decades ago because of a rare moment of absolute bravado by the Russian Federation's supreme leader in 2003. Vladimir Putin took the stance of Henry the VIIIth at the podium in front of elected representatives and dignitaries. The adulating audience cheered loudly. It was only for a few seconds.

In the 1970's, my father took my brother and me to the National Portrait Gallery in London, England. The place was very posh and we were the only children at that hour in the museum. There we saw the portraits by Hans Holbein the Younger of England's grand king. The portrait was massive and magnificent at the same time. Years later in my high school history class, my instructor, Dr. Stefanacci, taught me the importance of sea cannon in securing trade routes for the British Empire.

Henry the VIII had his navy invest in armaments. They came up with a superior cannon that could outshoot Spain's massive ships by a little over 100 ft. The Royal Navy built new schooners with this lighter cannon and went after the Spanish Armada. The defeat of Spain's navy brought centuries of prosperity to England. It is fair to say that England and its navy dominated the seas for nearly two centuries.

I asked myself why would the President of the Russian Federation stand that way. As far as everyone knew, this Slavic nation was weak militarily in 2003. Or was it really. In 1985, I came up with an ingenious invention, the Defense Oriented Inertial Guidance System. This system would enable tactical aircraft to utilize its ailerons and fins to avoid missiles. All of the plane's defense mechanisms were done by the plane itself, independent of the pilot. Enabling the pilot to maintain its target run. I had come up with this to win a scholarship to a major engineering program. My instructor thought it was the dumbest thing he had ever seen.

I never got anything for it, except ridicule from my peers and instructors. My teachers at Stuyvesant High School were told by Robert Wagner, the head of the NYC Board of Education, to be mean to me. A year earlier, Mr. Wagner participated in my father's murder.

A decade later, an unknown mathematician named Grigori Perelman solved the Poincare Conjecture in Russia. A decade would pass before he would publish the solution for the academic public. When you put his solution into an advanced RISC processor computer, you come up with a way to shoot a missile into a moving plane from the ground. I realized that in 2004. I did not share anything I deduced with the vast US military. The problem with Perelman's analysis is that his equation did not show how to track an object in three dimensional space from the ground (for that you need advanced radar).

How do you find an F-117 stealth fighter in a cloud? The only way you can find any plane is via its yaw signature (this is what separated DOIGS from most ABM systems). Unbeknownst to the Pentagon in 2003, Russia had spent a fortune building DOIGS. It also incorporated Perelman's solutions into DOIGS long before the published version of his research papers surfaced.

Russia's S-400 system had already been built. She was looking to prove that the system could take out US planes. The proof was necessary to get America's number one ally, Saudi Arabia, to switch sides. Russia and Saudi Arabia as allies would easily choke the entire US economy by manipulating the price of oil.

Saudi Arabia and its Bedouin would rule the world. That fantasy came to an end after I wrote about it in 2005 in my book, "The Rise of Hindu Supremacy, The Collapse of The United States". Rather than talk about the weapon system, I stated that nuclear weaponry was obsolete and meaningless in an artificial intelligence (AI) future. I then stated that WASP supremacy would end. Nuclear weaponry's end means that the oceans were meaningless as an advantage for our nation. Thus, time would no longer favor the United States. Therefore, the planet was moving to a zero time environment.

My research was based on three seconds of video of a Putin speech in 2003. Can you, the reader, imagine me speaking to a sea of white faces or worse, the Negro Condoleezza Rice or the Stepin' Fetchit, General Colin Powell? Their job was to be the house niggers to the mentally challenged President Bush. Explaining myself would lead to broad ridicule and humiliation by

anyone, black or white, with military authority or legislative authority in our nation. Consequently, I never explained myself.

In 2008, more bad luck came my way. The Rockefellers, after being told by the vast legion of Jim Crow Jews at the Metropolitan Museum of Art about my books, convened a kangaroo session of the legislature in the State of New York and banned all books with a swastika on it. The law was absolutely draconian. My book, "The Rise of Hindu Supremacy, The Collapse of The United States", had a swastika on the cover. No one could read my book. The book could not be carried in a briefcase. It could not be wrapped in a brown paper bag. It could not be displayed or advertised. The law was signed by Elliott Spitzer, Joe Bruno, Sheldon Silver and Andrew Cuomo. Everyone who worked to ban the book was also from Harvard University.

Peggy Noonan, a racist and Republican stooge, in a bizarre *Wall Street Journal* editorial asked me to reveal myself. It was bizarre because my name and biography were on the books. The FBI could have easily found me. After all, they participated in my father's brutal murder on March 20, 1984.

I thought of going to different military bases and talk to them about Russia. Then I realized that our nation's secret societies (Skull & Bones, Opus Dei, KKK, John Birch Society, Society of Jesus, Jim Crow, the Tail Hook Association, and the Sons of Cincinnati to name just a few) and also Russian spies would be at those bases as well. I was a coward. I decided back then not to write this book and focus on the collapse of the United States in 2008. In the last two years, I refocused on Russia.

It is impossible for any American to understand Russia. The Russian Federation is an enigma, wrapped in a conundrum, firmly emplaced in an ancient nebula in the far reaches of deep space. A nebula cannot be understood with an electron microscope or a fine tooth comb. There is no substance whatsoever. This is the result of people not looking at the country from afar.

Russia and the USA work together to maintain capitalism and communism. These two systems of thought are the two sides of the coin that is white supremacy. These two words are utilized to murder tens of millions of aborigines worldwide. As these two systems sought to dominate the planet,

their hegemonic stance forced a thousand ancient races to obliterate their antiquated ways of life. No longer were staffs utilized. Spears disappeared. Clay and stone were only used in remote villages. The bow and arrow vanished.

With hegemony came the humiliation of leaving Eden. Dark skinned races were ashamed of their skin color. Societies became alarmed at the sight of breast feeding. The gluteal fold disappeared under layers of mass produced fabric. Their natural affection to each other was viewed as libidinous. Kinship became forbidden. Bombarded by endless images of alabaster skin tones, aboriginal races abandoned their devotion to the sun and started being afraid of nature.

Russia and the United States have hidden the obvious truth about their symbiotic relationship for 75 years. Both nations have only one goal; to make sure India remains poor. The Great Powers have done a wonderful job.

It is impossible to understand Russia. However, when you realize it is a white supremacist nation, it is easy to see its future.

Chapter 1: The S-400 Weapon System

The S-400 weapon system has completely altered the economic landscape for the Russia Federation. Since Vladimir Putin appeared on the podium back in 2003 and up until 2025, Russia had complete air superiority on the planet; unbeknownst to anyone in America. Three Presidents have augmented the American arsenal with trillions of dollars of new planes, radar systems and missiles. None have survived the lethality of this system. The technical details of the weapon system will not be discussed in this book.

The most dangerous planes we have are not our fighter jets, our bombers or even our helicopters. Russia, to this day, remains incredibly weary of our U2 spy plane. The country is fully aware what goes on in the stratosphere. The stratosphere is the world's largest cloud, capturing all sound beneath. Everything that is spoken is trapped up there, bouncing around. The sounds are the fabric of the atmosphere, creating an early warning signal for the planet if any object move's faster than the speed of sound. The U2 flies up there slightly above the stall speed of its engines. Silently listening. Silently taking photographs.

Sputnik's tape recording systems, generations ago, revealed to the Russians that all kinds of conversations can be recorded in the atmosphere. It took years for our nation to discover this. Russia's lead in eavesdropping has never ended. The bullshit videos of the Korean Air Lines disaster during the 1980's was kabuki. Americans have a deep desire to believe Russia is a dinosaur.

The U2 plane has no velocity advantage over the S-400 weapon system. At high altitudes, the plane flies above the S-400's maximum range. Our plane can stay up there for hours and drop its camera films into welcoming naval vessels. But if the plane declines into the S-400's range, it will be shot down.

The SR-71 can fly past the S-400 system. But Russia can see this plane for thousands of miles. The exhaust of the SR-71 is so powerful and hot, it can easily be tracked by our reconnaissance satellites. This plane has been brought back into service to serve as a psychological panacea for the geriatric armchair warriors of our nation.

The S-400 weapon system is integral to Russia's future. It has brought back some relative security. At \$1 billion plus per system, it is expensive. With China, India and Iran as customers, it has provided a safe level of annual foreign currency reserves and ruble licensing fees for weapons manufacturers. More importantly, Russia has yuan, rupee and rial revenues outside of hydrocarbons, enabling it to buy carbohydrates, proteins, lipids and consumer goods for its sophisticated and diverse population. Without this weapon system, Russia could not monitor the endless penetration of its airspace by US and NATO aircraft.

Chapter 2: Global Warming

The greatest lunacy manufactured by the racist William Gates of Microsoft has been the broad attack on American industry by way of the myth of global warming. Americans were stupefied by the complete aversion to global warming rhetoric by the Chinese as well as the Russians. Unbeknownst to most of us, global warming has one clear beneficiary, the Russian Federation.

This nation forgets the history of the maritime lunatic, Henry Hudson. He set on a journey to find the mythical Northwest Passage. This route actually existed for centuries. It disappeared as Europe and South America civilizations stopped clearing their forests. The vast increase in carbon dioxide disappeared and the Northwest Passage became ice and, eventually, tundra. Mr. Hudson did not have the assistance of modern satellites to guide him or atomic ice breakers to clear the rivers that were in front of his ship. As winter crept south from the North Pole, the river that he traveled on started to freeze. He died of frostbite and starvation deep in the snows of Canada; his ship locked in ice.

If the tundra of Canada were to disappear, then our ships could traverse the Great Lakes, get into the Canadian river system and then travel north to the Arctic and to the Sea of Japan. This over ice trip is already occurring in the Arctic Ocean. It knocks a full twenty-two days off the passage to China from around the Cape of Good Hope. It will lead to trillions of dollars of GDP growth in Russia and complete rebalancing of the power structure of Europe. Europe, in order to protect their sea routes and existing harbors, will have to rearm. Western nations will have to spend countless resources to drive men and women into military service. The bogus socialism and the endless tax evasion of Europe's gentry will disappear like a camel's snot in the desert. But most importantly these nations will have difficulty sending its best and brightest to America to spread herpes and HIV.

Global warming was created by our industry and the exurbization of undeveloped forests. Americans moved out to the woods knowing they could get away from urban drug related crime. They could buy homes that were the size of mansions for the price of a small one bedroom co-op in a major city. Thanks to the massive highway speed limits supported by Fannie

Mae and Freddie Mac credit expansion, forests all over America were cleared. Then, Brazil started clear cutting to seek El Dorado all over the Amazon. The massive increase in carbon dioxide by our nation's modern-day Hawt-Smooley Tariff speed limits and Brazil's Nazi ancestry's grandchildren trying to recreate the glory of a Germany that has long disappeared has wreaked havoc on the Arctic. The entire Arctic Ocean has been destabilized creating an iceberg dotted passageway between Greenland and Vladivostok. The vast majority of this route is secured by the Russian Federation.

Americans joined their Brazilian counterparts in the woods. Far away from civilization. Speed limits rose to 85 miles per hour. With few highway patrols, many drivers were traveling 100 mph plus. The resulting increase in greenhouse gases was beyond comprehension. All of it traveling via the stratosphere right to the Arctic Ocean. To combat American industry, the Netherlands manufactured a Joan of Arc, obfuscating the role of its own banks in American expansion.

Soon it was all over the news. Bill Gates who helped the Rockefellers build the world's largest prison system, was now looking to get rid of oil all together. The most ridiculous thing about this debate is what the natural price of oil is. Without these exurbs, 200 miles from the central city, oil would have gently floated to its marginal cost of \$2.25 per barrel. This alone would have collapsed global demand everywhere.

Oil has two value drivers throughout our nation. Prostitution and incarceration. Without these two aspects of oil, gasoline in America would be less than 25 cents per gallon.

The Rockefellers played our nation for fools for decades. By making sure no one with O- blood citizens could never have the financial resources to challenge their authority, they ran amok on our environment, our children, our women and our men. The Rockefellers were 100% supported by the Trinity Church whose \$38 trillion net worth makes it America's wealthiest corporation. Even men who support the Rockefellers are shocked at our nation's prison population. The United States has a prison population greater than Russia, China and India combined.

Now everyone sees why the S-400 is so important for Russia. Like the Orient Express, the passageway to the East is long and arduous. Bandits can hide anywhere in the Arctic Ocean. Along this route, sudden sabotage can occur. By mercenaries. Flagged carriers. Flagged fighter jets. Clandestine intelligence agencies. Like Spain with its vast wealth from the New World in the 16th century, Russia will make a fortune from China and India. Other nations will come after them. The future growth of Russia's wealth is staggering. Russia is looking at easily \$75,000 per capita GDP by 2050.

It is developing oil and natural gas fields all over the Arctic. The land has become accessible because of global warming. Our nation, via its narcissism and vanity, is driving Russia's massive GDP increase.

Chapter 3: Domestic Tranquility

Domestic tranquility is how civilizations create psychosocial security so that men marry the opposite sex and decide to start a family unit. Those who do not want to marry can seek careers that offer little compensation and provide endless company with the same sex. It is a fancy word for structure and setting up the concept of place. Military base. Farms. Birth place. Towns. Marriage halls. Churches. Homes. Schools. Power plants. Leisure. Hospitals. Cemeteries. And the endless laws and meandering bureaucracy. This concept has been impossible in the old USSR. This period in Russian history required the people to shed their most innermost aspects and to become part of a communal whole. On paper it looks easy. But in reality, the entire pressure was on women as they had to deal with the vagaries of life. The vicissitudes of adult married life are impossible to fathom when the state says there is no wealth, no security and no history.

Men faced incredible obstacles especially if they were not part of the Communist Party. Like the heresy of religion, the USSR had to manufacture a Russian form of psychology to keep its adherents in line. All in the hopes of teaching men and women the rites of passage. On paper it looked wonderful. But the sanitary health clinics said the opposite. It was impossible to feed children. Their care was also impossible. Poverty according to the USSR did not exist. Russians attempted to translate Shakespeare's Hamlet soliloquies into the vernacular. Abortion for decades was the only form of birth control in Russia.

It will take decades and prosperity to change the Russian mindset to abortion. This is not impossible. There are worst medical procedures to avoid. Women can easily change.

What we are witnessing with Vladimir Putin and with all the oligarchs who returned to Russia is the reinstatement of **Herod the publican** into Russian society. This is necessary to reintroduce the Bible and religious authority to the nation and its hinterlands as a whole.

Vladimir Putin was interviewed and was asked about communism in Russia and he stated what was missed by the interviewer. He stated in Russian, that "we are all believers". The interviewer, in awe of the magisterial Vladimir Putin, didn't even understand the ramifications of this remark. This meant

that the Russian Orthodox Church had returned to the aegis of the Holy Roman See and all prelates were under the supervision of the Pope. Everyone who read this or heard the interview were completely ignorant of what it meant.

This meant that Russia was looking to reintegrate with the Catholic Church. This also meant that Russia was coming into favor with the Vatican and that the United States would soon be out. Pope John Paul II had absolute authority over the United States. Roman Catholics controlled the United States via the massive bearer bonds held in 14,000,000 plus Liechtenstein accounts. These accounts were pledged as security for margin loans in Switzerland. Liechtenstein brokers traded off of the margin equity in these accounts.

The beauty of Liechtenstein accounts was the treaty between Liechtenstein and Switzerland. Investments in real estate (including dividend paying real estate investment trusts) were exempt from Swiss and Liechtenstein taxes. Individuals would borrow at 1 to 2% interest rates utilizing gold and US Treasuries as collateral and earn 8 to 10% on their accounts by buying dividend paying stocks on margin. Since the assets were hypothecated (meaning pledged or margined), tax attorneys from the large consortium of Jim Crow Jews would give them “could be” tax opinions that could be presented to the Jim Crow Jew controlled IRS to help avert, avoid or end an income tax audit. The Jim Crow Jews along with 11,000,000 plus Roman Catholic tax cheats in the USA were the so called “bond vigilantes” of the United States bond markets. Whenever our nation tried to increase the minimum wage, welfare, Medicaid or enhance school lunch programs, the Jim Crow Jews would attack the programs by artificially increasing interest rates via incredibly large bond sales from their leveraged Liechtenstein accounts. Sometimes \$100 billion in US Treasuries would move in a second. Algorithm, read AI based trading software, would pick up these movements and join in the bond trading activity. When you realize that these accounts had over \$63 trillion in them, you will see what a pittance \$100 billion is (not even a day’s cash flow). These individuals, the so called “bond vigilantes”, have zero power now.

It is illegal for any US citizen to own an account in Switzerland. By hypothecating and putting margin equity into Switzerland, the Jim Crow Jew

tax attorneys would argue with the IRS that no account existed in Switzerland. To make sure they never got caught, Credit Suisse and UBS bankers (to name just two of over 1,213 institutions globally) would visit fancy restaurants and leave pre-paid Visa and MasterCard debit cards for their clients. The cards were then given to the clients in their menus when they ordered their late afternoon lunch. In New York State, close to \$10 million was given daily to the "ladies who lunch" circuit.

Conservative Catholics and Jews would routinely chastise the working poor in our nation and tell them to pull themselves up by the boot straps. The vast majority of the poor in our nation are white women with children. Our nation's tax cheats all went to America's top universities, especially Harvard University, and their Harvard classmate Barak Obama made sure none of them went to prison.

Roman Catholics controlled Fannie Mae and Freddie Mac via massive holdings of the company's stock, preferred stock and debentures. Fannie Mae and Freddie Mac preferred comprised the BIS capital of over 4,000 financial institutions in America and thousands more outside of this nation. These shares were also the capital of all New York money center banks. The transportation of all goods and raw materials in the United States were controlled by Roman Catholic unions. Furthermore, NAFTA gave the Pope more power over the borders of America as Roman Catholic nations bordered us to the North and the South. The Pope controlled all the fuel going into the USA via the Rockefellers, the Mellons and the Kochs. The entire coal industry and nearly all of home heating oil in America was controlled by Roman Catholics. The most important aspect of the Pope's power were the bond insurance companies. With a sliver of capital (less than 1% of all bonds insured), these companies controlled the entire American municipal bond market. The Vatican gained all of this power via the laundering of trillions of dollars of narcotics profits through Bear Stearns, Lehman Brothers and Credit Suisse.

What few people understood from 9/11 and Vladimir Putin's remarks at the turn of the century as he became the second elected President of the Russian Federation is that the USA was on its way out and the Russians were on their way in. This all fell apart as the author's remarks became well known. Robert Hanssen had gone to prison for espionage and the new FBI

agents covering me were too busy chasing *al Qaeda* leads for 9/11. During that brief time, I came up with a thesis that revealed our nation was going to collapse. I started with "The Rise of Hindu Supremacy". The next book was "The Rise of The Fourth Reich". Then I foresaw "World War 3" and the complete collapse of the United States.

I was researching Adolf Hitler and noticed that few of us knew that the burning of the Reichstag (a building the size of the White House) was completely fabricated and a hoax. Lacking live television in the 1930's, Germans were reliant entirely on radio. Based on radio broadcasts of the time, the German populace was under the impression that an invasion the size of the marauding 4th century Huns had occurred. Unfortunately, it was only one prisoner who had escaped an insane asylum who set fire to a building using a dinner candle. Under interrogation by Allied Forces during the armistice, the Nazis revealed the massive hoax they had perpetuated. After the fire was put out, Adolf Hitler and the Nazis passed swift laws to protect the homeland. The Third Reich consumed the Nazis until World War II started in 1939.

Using this logic, I hypothesized that the United States was terrified of an electrified India and would prevent it at any cost. The destruction of the World Trade Center and other buildings would be used to suspend civil liberties and to formulate a Fourth Reich. The Patriot Act and the Homeland Security Act would be used to protect the beneficiaries of the World Trade Center detonations from criticism. World War III would follow in 2008 after the United States collapses and Russia would destroy the USA in armed conflict as it had superior weapons (recall Vladimir Putin's stance at the Dumas podium).

I was laughed at completely by everyone I met. Book 1 was viewed as fatuous. No one ever heard of artificial intelligence (AI) and there is no way India can catch up with the USA utilizing AI. China? How? Where? Hundreds of ridiculous statements were hurled at me. When I wrote the book, the USA was the dominant economy of the planet. Book II was laughed at. "Iran a threat to the USA? Bedouin? Are you kidding?" Book III was ridiculed. "Tom, India is a threat to the USA? The USA is going to start World War 3 to destroy India's economy?" But the facts now say counter wise.

“Russia as number one? How? With what weapon system?”

Had I written this book first, it would have been impossible to comprehend. But now, it appears that the massive gains in Russian oil prices will result in massive wealth coming to Russia. Based on a \$160 ppb oil price, Russia will double its economy in just three years. That is a staggering amount of wealth coming to the country.

Russia is well on its way. The Russian Orthodox Church is taking steps to advance religion. As belief becomes part of the society, it will be possible to put in tax regimes that benefit the development of an aristocracy. A Russian form of aristocracy.

I do not want to criticize Russia because no one likes to talk about blood types and personality. France, like Russia, is filled with O- blood type personalities. It makes the state hard to govern. This is true for Russia too.

Domestic tranquility will be established as Russia creates the same type of white supremacist system the West has. Contrary to what is said about Russia, the country has a lot of immigration and also illegal migrants. As Russian prosperity spreads, expect illegal labor from Mongolia, China and the Urals to increase. With immigration, comes the manufacturing of inferiority complexes. Russia's FSB is expert at creating inferiority complexes. This enables the state to manipulate people with broadcast and internet videos of racism and sexism. It is normal.

Communism has one fault. Women want to work. As capitalism spreads in Russia expect the rise of entrepreneurial female tutors, maids, cooks and nannies. AI, like India and China, will produce a massive permanent boom as these nations do not have a vast pool of minority labor to exclude from labor markets like we do in America. The most important aspect of Russia's future is leisure. As China exports millions of kilowatts of electricity from its massive hydroelectric dams to Russia, energy abundance will be evident. Russians will start hotels, gyms, restaurants and internet cafes. Leisure will permit Russia to develop human aptitude in its children with less proteins. The end result is greater creativity.

As Russia reincorporates the Russian Orthodox Church into domestic tranquility, it will have to create tax laws to permit donations, seminaries, monasteries and also convents. In addition, it will have to formulate laws for religious schools for children as well as boarding schools and summer camps for religious indoctrination.

The fool in the Bible says there is no God. But the aristocrats' tax lawyer, as well as his cleric, insist there is a God. This bit of humbug is necessary to create tax avoidance schemes. Russians are well versed in dodging the tax man. Let's not forget that Judaism, Islam, Catholicism and evangelicals will also want to have similar rights as well in this new abundance.

Chapter 4: Religious Freedom

Religious freedom in Russia is an oxymoron. There is no religion per se. Up to 1989, the former USSR spent incredible resources and manpower to make sure religion did not exist. Religious belief is easy to stamp out when you take the concept of the self out of the culture. Group sex. Group showers. Group cafeterias. Circle jerks. The orgy of bodies eliminates the idea of self. No religion on this planet can exist without the idealized self of the female.

Our nation, contrary to Russia, is full of hyphenations. We are forced to identify ourselves as some form of dark brown race attached to the word American. Whites are prohibited from doing this. We in America did this to institute Muslim caste. Just like Muslims instituted caste in India centuries ago, we in America created the "white" ethnic group. By placing one line for whites on school identification forms, as opposed to the 533 unique ethnic white tribes of the USA, the State Department was able to convince the populace that dark skinned races outnumbered whites. Although whites comprise more than 315,000,000 plus people in the United States, they have been convinced by internet images of random acts of violence that whites are scarce in number.

The Russian Orthodox tradition dominates the think tank produced census of recognized religious thought in Russia. After that there is Islam, Judaism and Catholicism. For religion to exist and thrive in Russia, the country will have to create the concept of the self again. This means also creating the concept of personality. This is easy to do. Especially with capitalism as the guidepost. As individuals identify with wealth, there is a need for community and status. Racial segregation is normal in capitalism. Capitalism and religion are intertwined.

Religious belief comes from the ingestion of L-tryptophan and melatonin enzymes by human beings. These two chemicals induce memory and sleep as well as dreams in the human cerebellum. Dreams can consist of fantasy and also nightmares. The introduction of paranoia and neurosis, necessary facets of capitalism, is relatively easy with expanded immigration. Expanded immigration. targeting O- blood types and imbeciles who worship horoscopes, is facile to accomplish. The key is to manufacture the delusion of the "Russian Dream". Russia has a vast history with immigration prior to the Communist state and the FSB can study the absolute hyperbole of the "American Dream" to create the endless delusions of get rich quick schemes.

I can easily see twenty years from now, time share advertisements of a sweaty fat Rumanian sun bathing near his *dacha* near the Black Sea parading his protruding belly from his red bikini holding the waist of a blonde model who is pretending to be his love interest. The announcer tells us how his "zero money down" mortgage made him a millionaire. Then, someone shows us the toll free number to call and the website to visit. He exclaims "order now".

The current crisis in Crimea will bring millions of new immigrants to Russia. Russia, like Europe and our nation, encourages white immigration even at the retard level. Just like us, Russia will create fantastic wealth for buffoons and idiots. As foreigners see the images of gypsies and Rumanians driving in Mercedes and flying in private jets, they will flock to the shores of St. Petersburg, Moscow and Vladivostok to pursue the Russian Dream.

Russians are weary of religion. They talk like the lower middle class Indians of Hinduism; criticizing clerics and calling donations bribery or licensed thievery. But with wealth and prosperity comes the need to get away from *hoi polloi* and seek community. It will take a few decades but religion will win out.

Religion has a welcome ally in industrial agriculture and dry goods manufacturers. The two industries need religious holidays to create sustainable and predictable demand for agricultural commodities. This permits railroads and trucking fleets to coordinate construction, equipment purchases, fuel demand, and personnel. The end result is predictable demand for fertilizers and fuel.

If we study the Dark Ages, we can see how religion will take hold again in Russia. The Dark Ages were neither dark nor devoid of Christianity. Moorish Europe flourished for centuries. The ruling class needed to maintain power via the military based psychological concept of span of control. The rise of towns with expanded trade to the Far East and to the New World brought credit via gold deposits to banking centers. This created ample room for credit expansion.

Towns expanded into cities with employment. Services expanded demand for opium via hospitals, prostitution and violent crime. Expansion of the military also enhanced demand for metallurgical ores and craftsmen. Demand for buildings expanded demand for timber, iron, bricks and mortar.

The key aspect of Christian growth in the West was the introduction of opium and the departure of Muslim birth control methodologies. While the aristocracy continued to have access to barrier contraceptives and herbal remedies to terminate pregnancy, the vast majority of the citizenry did not. This allowed Europe to have population growth.

The Crusades were incredibly important for bringing opium from the Persian Gulf to Western Europe. Opium, as a narcotic, enabled members of the aristocracy to have vivid hallucinations and dreams about Christian myths. All religions need wealthy adherents to finance their tabernacles. Spreading the message of a deity requires food, lodging and personnel.

As Russia expands religion and the female concept of self, she will need to expand her demand for opium, heroin and morphine. While the criminal element will expand demand for street heroin, health care and food demand will increase the need for morphine for general surgery and tertiary surgery. Pregnancy alone will increase the need for morphine. Without morphine as a pain reliever, 90% of Western surgery would disappear. Although surgery would remain possible, recoveries would be incredibly painful.

New religions are coming to Russia. This includes the Mormons, the Seventh Day Adventists and the Jehovah's Witnesses. Then comes the army of Hare Krishnas along with evangelical Christianity and its tent revival worship. Such is the demand for Russian converts. As hospitals crop up all over a wealthy Russia, there will be rumors of a miracle cure of an oligarch. At the brink of death, an angel appeared to him in his morphine-filled sleep. She was a beautiful white woman with white wings and a halo. You will be amazed, at the throes of death, what a nurse in her uniform and white hat looks like when you look at her with morphine glazed eyes. The religious order that bags that "whale" will grow dramatically.

All these faiths will help Russia balance the sacred and the profane. Thus, clerics and the state will create the delusions of original sin, eternal life, eternal damnation, miracles, heaven, hell and armageddon which will enable their population to create the allusions of life and death. These fictitious realms are also needed to expedite the acceptance of the microeconomic constructs of demand and supply in the commercial marketplace. After establishing a permanent all white leadership class, like we did in America, the end result will be broad psychosocial security. The Chernobyl incident from decades ago

along with past natural disasters, as well as future human frailty, give an opening for all religions to seek divine community with the vast Slavic population. When deflation returns to the Russian Federation and time permits, the Kremlin will create a criminal class with dark skin like we did in the United States to blame for all of the nation's and its industries' failures.

No government on planet Earth can fight deflation. In the 1980's, the United States worked with European, Canadian and teacher's pension funds to finance leveraged buy outs (LBO) and fire African Americans from jobs. The profitability of all LBOs came from the massive retirement medical pension benefit reserve set aside for genetic diseases such as sickle cell anemia that Negroes get. By firing all of the blacks, the LBO specialists freed up the reserves and they were divided out to the wealthy Jim Crow Jews who perpetuated these frauds. These genetic anomalies are also why blacks are not hired in America today.

Southern racists tolerated LBO's as it helped them maintain the color line in voting. Poor blacks overwhelming voted Democratic. So Republicans passed laws to emplace black felons into jail for the smallest offense. In many states of our union, if you are black and commit a felony you will be denied the vote. After massive Negro job loss, Ronald Reagan and George Bush worked with Israel's Mossad and our own CIA to fill our father-less slums with crack cocaine.

Selling \$5 of crack cocaine brought a minimum of six months in a maximum security prison. The expansion of prisons enabled the racist and white supremacist petrochemical industry to receive billions of dollars in federal subsidies enabling them to finance gas pipelines throughout rural America. The resulting murder and crime from the nation's crack epidemic filled American prisons with black prisoners, creating millions of jobs for prison personnel, district attorneys and constables. Within a decade, the unbridled distribution of crack cocaine facilitated Republican takeover of the House of Representatives, ending decades of Democratic power.

The federal government also changed ownership laws in broadcast television, allowing television stations to own programming. TV created endless news shows filled with dark skinned felons. A nation that is 90% plus white became convinced that illiterate, destitute Negro teenagers were the masterminds and primary beneficiaries of our nation's multi-trillion dollar narcotics trade. To deepen the dissonance of Americans further, Hollywood filled movie screens

with worthless men who became multi-millionaires selling narcotics. With the help of our Muslim allies in Pakistan and Persian allies in Iran, we recreated the caste system of Hindustan and 18th century France where dark skinned people queued up to become the prisoners, load bearers and muscle of the nation. No one noticed that decades after *Brown v. Topeka*, America had a black public school system and an alabaster private school system.

The United States was so effective in creating the mythology of the Negro drug dealer that entire music genres had middle class pot heads posing as murderers, rapists, and sociopaths to induce middle class whites to purchase their *gangsta* music. It helped create the massively profitable rap genre in American music. But no one noticed that America's Jim Crow Jews were moving from LBO's that financed black unemployment to financial maneuvers that would fleece the vast white middle class of its social safety net. So successful were the aristocracy in bamboozling the citizenry, Europe started to copy our nation-- endless "nigger vision" going on during news broadcasts. In our nation of 350,000,000 plus human beings, crime is only done by 7,000,000 black people.

The stupidity of Y2K, as well as the 9/11 detonations and the 2008 depression, led to a massive collapse in American optimism. Consequently, there was a decline in live births. For fifteen years, Americans became terrified of getting married, having children or taking risk.

We have run out of adolescents to blame everything on and thus, we have a massive collapse in teenage crime. Now youtube and pornography are broad casting shoplifting. The end result is a massive decline in employment for the criminal justice system. The criminal justice system only works if blacks go to jail. As soon as you start putting white men and white women in jail, the system will collapse from its own hubris. This is what happened to France in the 18th century.

Russia faces the reality of convincing its citizens about its stable future. That is only possible in a world of growth. But Russians are not stupid. Growth can easily be curtailed by the machinations of the *Amerikanski*. *Dah!!!* They all grew up with Communism and the belief that the state, not individuals, were the land lord. All promises are eventually broken, according to the ordinary Slav. Russia has a vast history of divorce and family upheaval. It is hard for any Russian to trust the future; they have been through so much. Thus, religion has a long march up hill to pursue.

There is one fail safe for the Russian Federation that few Americans understand. And that is Russia's open arms for many dissidents and artists of the Communist era to return. If what Vladimir Putin is saying is true, then Russia realizes the need for criticism to maintain the future capitalist state. More importantly, these women and men fabricate a web for information and thought that the eight-legged FSB cannot capture by its agents alone. Furthermore, this propaganda reveals that Russian society is looking inwards. That is the telltale sign of a civilization that needs spiritual succor.

Chapter 5: The Crack Spread and Women's Liberation

I really do not discuss business or Russian industry in this book as it is meaningless. Business is really just charging more than it costs. Only in the US, do we apply calculus and the second derivative to selling bread. Pure bullshit!

Commerce is difficult to discuss in hydrocarbon economies unless you discuss modern petroleum distillation. Endless nonsense is written about worthless nuclear energy. Nuclear power cannot produce a good for sale. A barrel of oil produces a little over 46% gasoline. The remainder of the barrel produces diesel fuel oil, naphtha, petroleum jelly, kerosene/jet fuel, propane, asphalt, industrial lubricants and refined product for asphalt, polyester and rubber manufacture. For petroleum to be profitable, these residual products have to be sold.

Prisons were built so we could use diesel fuel oil to heat them. Prisoners were housed far away from cities and that would require large buses to transport them to the exurbs of America. Factories need plastic, polyester, rubber and steel to manufacture a bus. These buses would also require diesel fuel to run. Pipelines had to be built and that also required oil. Divorce and adultery were encouraged as it resulted in more housing and cars built. All of which require oil. Divorce split up families and you had to travel to see the other parent. This required gasoline and jet fuel.

Polyester was manufactured so we could sell refined product and also sell PET pellets to industry. Menstruation caused stains in clothing. Dry cleaners had to be built all over our nation. Prostitution was encouraged as it required the sale of nylons, lipstick, make up and douche water. All of these products require oil as an input. Abortion was encouraged as it required separate medical buildings and equipment. Poverty was encouraged as it promoted the use of diesel fuel oil to grow cheap farm produce for the poor. The United States maintains and expands poverty to increase the price of oil and gasoline. Poverty causes divorce, abortion, prostitution and incarceration. All of this enables the price of gasoline to fluctuate.

Russia, like the United States, is entirely reliant on petroleum for energy. It is also the basis of the entire economy. **Oil is the source of all aristocratic power.**

It is safe to surmise as Russia expands its GDP via oil exports and the resultant sale of military hardware, it will need to increase female careers and also opportunity. While Americans talk about endless liberation of the American female, it is canard. Female liberation in the United States is just a fancy word for consumption. Excluding consumption, there are no poor women who made it in America. Large corporations and banks cannot get men to keep getting divorced and keep starting new households. They have made up the decline of white male poverty with female rights and female liberation. Like gay liberation, sexual liberation means more consumption for manufacturers, agriculture, insurance and banks. It is always how it works.

The crack spread ultimately means that as oil increases in price, it becomes profitable to put men in jail. When you incarcerate men, it surprisingly increases the wages for women in the workplace. The Jeffrey Epstein scandal, one of hundreds of sexual scandals that have come to light with the internet, reveals the incredible level of oppression of poor white women by the aristocracy.

Poor women were enticed into lifestyle choices that few in the aristocracy would countenance. Girls living in trailer parks and housing projects (meaning poor girls) were promised opportunities to go to expensive colleges based on the recommendations of many of the executives and law partners that visited Jeffrey Epstein's houses of prostitution. Few Americans know the incredible sexual violence that white children face in their communities as they try to go to college. Affirmative action for white women and black men has been impeded by the aristocracy molesting girls and endlessly incarcerating boys. Since it is not published in the Jim Crow Jew owned newspapers, or broadcasted on Jim Crow Jew owned television or radio, it must not be true.

I have never talked about the incredible debauchery of the entertainment business because it is not news. Only hermits living in the forest do not know what goes on in Hollywood, concert halls, theaters, radio stations and television broadcast. Since Vaudeville, there has been decadence in the "dream" business. Entertainment, all over the planet, is full of sex. The beauty queens and cheer leaders of America are drawn to reckless lifestyle choices. Media all over the planet present these women as naive to protect the perfidious industry behind their exploitation.

From 1968 through 2008, oil skyrocketed from less than \$5 per barrel to well over \$125 per barrel. This made incarceration incredibly profitable for small

cities and wealthy states in our nation. To maintain its profitability, hydrocarbon manufacturers through their control of our nation's legislatures, placed incredible prison sentences on the massive number of Similac-fed babies born in the 1970's. Ten years, twenty years, thirty years all the way to a hundred years of incarceration were mandated by law to prevent drugs being sold in America's slums. Nowhere were we told that the drugs were being sold to black drug dealers by the families of four Presidents.

The people who ruled us were forcing the poor to sell drugs in the slums. The end result was a vicious cycle of narcotics, prostitution, violence, incarceration and poverty. The Vatican and the Rockefellers developed the Liechtenstein Tax Maneuver to hide the trillions of dollars in wealth created by narcotics. Over 18 million Americans participated in tax avoidance for decades utilizing the Liechtenstein Tax Maneuver. By making sure America's wealthiest corporations did not pay taxes and also making sure America's wealthiest citizens did not pay taxes, mountainous bulwarks were placed in cities to prevent social progress by the white and Negro poor.

How is incarceration profitable in the United States? A city needs to pay the wages of prison guards and prison administrators. Also the food, water, sewage treatment, clothing and energy to house prisoners must be allocated via taxes through the legislatures of the land. The secret of prisons in the United States is that they are paid by Social Security taxes, Medicare taxes and Medicaid taxes. This also explains why prisons have incredible disease rates.

HIV, HPV, and Herpes run rampant in prisons. Prior to HIV, healthcare insurance companies maximized lifetime care at \$1,000,000 per citizen. HIV comprises \$5,000,000 of care. So insurance companies expanded health insurance premiums. Medicaid reimburses prison systems for the care of these diseases. When prisoners are sentenced to thirty years or more of prison time, the state can assess their social security benefit. One other factor of American prisons is that prisoners can earn 5% to 10% of the state's minimum wage doing labor for contractors licensed to hire prison labor. Clearly, American prisons are concentration camps for the poor.

More importantly, prisons require the building of natural gas, petroleum and propane pipelines to rural hinterlands. These pipelines are important as they are paid for by large corporations. Many cities in America lost manufacturing jobs via leveraged buy outs in the 1980's and 1990's. To create opportunities

for the unemployed whites of the community, crack cocaine was introduced to black slums. This enabled the community to have occupations with pensions and medical benefits. In addition, prisons enabled small cities to expand their property values and maintain and expand primary schools. These communities thrived throughout rural America as the costs of incarceration were buried in social security, Medicare and Medicaid transfer payments and never appeared as income taxes or property taxes to rural towns.

Will Russia expand prisons to create jobs? I really do not know. The vast majority of Russians do not work. As oil revenues grow, Russia will have the financial resources to expand universities and to build technical schools. As China and Russia expand trade in the Arctic Ocean, expect massive windfalls to the Russian populace. Russia just does not have enough men to do everything. Once the nation and the new President of Russia instill domestic tranquility, the nation can look to new birth cohorts.

As Russia grows, it will need to empower women. In the 1990's, the USA made the SAT® easier so more students could attend college. The SAT® was made easier in exurbs and suburbs to enable more whites to get higher scores on the SAT®. Expect Russia to expand its universities and learning centers.

Will Russia come up with the same system we have where blood types and horoscopes are used? Russia was a capitalist-based system for centuries. I am certain they have this calculus already in place. The nation has all types of soothsayers and psychics. The beauty of these psychological forecasts is that they tell you great dream-like answers about your future, but never tell you the demons you will run into to prevent your success.

Unlike Russia which was a communist country for most of the twentieth century, we in the West participate each leap year in the bizarre and barbaric ceremony of *Immortalis*. *Immortalis* is an ancient human sacrifice ceremony that predates even the Mohenjo Daro civilization. As detailed by the Lombardy French in the four gospels of the Bible, a human being is brutally beaten and sodomized and then crucified. Then the person is murdered and burned in a fiery inferno. At the end of the ceremony, the individuals involved eat the body of the corpse and also drink its blood. The ceremony culminates at exactly 5:20 PM on March 20th. This ceremony occurs precisely at the Vernal Equinox. At this moment, it is possible to see the human soul exit the body of the sacrificial victim.

The purpose of the ceremony is to integrate the good and evil of Christian society. Industry, military, religious orders and organized crime engage in a bloodlust-filled homosexual orgy that integrates the power structure of the society. It has gone on for thousands of years and migrated to this civilization. In Staten Island, where I live, the *Immortalis* ceremony was done for nearly a hundred years at a place called the *Grotto*, located within the Society of Jesus Mt. Manressas shrine. Each year, children were kidnapped, brutally raped, immolated, and then eaten at this shrine. This ceremony also proves that the Bible is not a holy book but a codified system for the maintenance of aristocratic power by religious orders. The *Immortalis* ceremony is a homosexual ceremony and women are not allowed to attend.

Recent commentary about the ancient Mithraic faith shows the attendance of women but it is a falsity. The Levant is filled with Mithraic temples and statuary. All Mithraic temples were male only in the ancient world. Prior to communism, Russian Orthodox clergy and monks routinely attended Mithraic human sacrifice throughout the Far East and Europe. The ceremony is fully practiced in the Orthodox faith of multiple countries to maintain domestic tranquility.

Women's liberation already existed in the communist era of Russian history. Education up to the Ph. D level existed for women. Careers and career tracks existed for women. In academic research, there were women. In politics as well as the military, there were women. Just like America, well connected families and members of the aristocracy had the greatest access to careers. Just like America, nepotism is rampant. Vladimir Putin has several daughters. I doubt Putin's family, nor the Bush daughters or the Obama daughters cleaned tables, kitchens or toilets. Only a fucking idiot would think that.

Women need a sense of self for capitalism to exist. As religion reintegrates into Russian civilization, that psychological criteria can be checked off. Divorce plagues all of the white nations, even Slavic nations. Russia will need to work with religion, industry and organized crime to create a new tranquility. *Immortalis* is a proven method that Europe uses to maintain domestic tranquility.

The security provided by the S-400 weapon system will bring incredible opportunity for women. With this weapon system in place, Russia can push

ahead to build massive natural gas grids and also to upgrade its antiquated electric distribution grids. Abundant oil for roads and agriculture will be soon available. Hopefully, the disastrous ecological errors of the past will not be repeated.

Russia is a bigoted, racist and white supremacist nation. The United States is also a racist, bigoted and white supremacist nation. We have a lot in common with Russia. Russia is a messianic nation. We, however, are an anti-messianic nation.

She is the Cain to our Abel. We battle Russia. Russia battles us. The battles have gone on in the woods, in the oceans, in the sky and also in outer space. Nothing will change between us. The only thing that will change between us will be the clarity of the digital cartoons which we each create to show our racial superiority. As the Arctic Ocean becomes a major artery for trade and revenues for Russia, expect Russia to expand immigration. **Expect Russia, China and India to prosper in a manner not seen since the 18th century.**

Chapter 6: Homosexuality and Lesbianism

It is easy for me to talk about homosexuality and lesbianism in the Russian Federation. There really is no homosexuality and lesbianism in Russia. The Russians are very good at confidence games coming from a society that has gone through incredible periods of upheaval. The spy services train agents to pretend to be these things and agents who act better than others stay longer in the FSB. Counterintelligence and surveillance activities require employees to pretend to be these things. Many Russian agents pretend to be prostitutes to gather information. Russia is expert at setting up brothels to lure and blackmail businessmen and honey traps (this is where attractive women lure a schlub of a man with tall tales of dastardly lovers, pimps or bosses) to capture foreign dignitaries and spies.

The problem with alternative lifestyles in Russia is the long winter. Few movies ever show the reality of being in a homosexual relationship in a communist country. Many towns in Russia are below 15 degrees Celsius during the winter. The East Germans, a former communist ally of the old USSR, revealed the level of surveillance they did on lesbian athletes on their national teams and frankly, the details released made many communist athletes cringe. The most intimate aspects of their love lives were detailed, catalogued and circulated. Worse, many athletes actually fell in love with what were Stasi agents or informants. These individuals then set them up and betrayed them. This resulted, time and again, in lifelong psychological trauma.

Many adults going through these developmental stages will grow out of them according to Russian psychologists. Women find marriage hard. Men find marriage hard. Children make marriage even harder. The reality of life dawns on many and Russia encourages many to choose different paths. Do I see Russia changing? Russia has a long history going back to ancient times. It has an incredible anti-homosexual stance that dates back centuries. I am only saying what is. Do I think Russia will change? I really doubt it. These lifestyle choices are frowned on in all ethnic tribes in Russia's hinterland.

Russia has many ethnic tribes. Most of them are "elder" or seniority based. Thus, alternative lifestyles fascination with youth is anathema to Russian belief systems. During the communist era, homosexuals were allowed to defect. Mind you, for blackmail and extortion purposes, intelligence operations routinely tolerate and pretend to be homosexual and lesbian to set up honey traps.

Chapter 7: Divorce

The beauty of the depression that started in 2008 in the United States is that there was a hiatus of the endless diamond advertisements on television. In America, we give diamond rings to signal the engagement of a man and woman (and also same sex couples) into the future rights of marriage. Diamonds are the most valuable commodity on planet Earth. Their price is maintained by Russia not releasing trillions of carats into the marketplace.

A diamond, like marriage in the United States, is absolutely worthless. To get ahead in America, you have to have a cheap woman as a wife as she needs to regularly sleep with your boss so you can get raises and promotions (or be a cheap bisexual man who will sleep with his bosses to get ahead). *Jus primae noctis* is practiced throughout the United States by racist white corporations like Southern Company. There is no law to protect a married couple in the United States of America. The FBI and civil law enforcement for decades have terrorized interracial marriages and any marriage where the man has A+ blood and the woman has O- blood in order to promote divorce.

Divorce creates massive demand for diamonds. A worthless stone is sold readily to millions of Americans every year as they pursue a failed marriage. It is why so many men in America are homosexual. Divorce in America is more common than skid marks on men's underwear. It is a right of passage. I personally know a man who has been married eight times. Who knows how many children he has out of wedlock? This man was from the establishment of the United States. He spent decades fending off countless women who wanted that provenance of being a "white woman".

All over America, our women desperately want a white baby. That is all they dream about. Look at the tens of millions of women on lexipro, valium, paxil and prozac. There is a practice of law in California where the goal is to defend the rights of women who engage in promiscuity so that they can get access to their lover's property rights when they have an illegitimate child. The practice has gotten so lucrative that law firms are replicating the field in other states. I am not making it up. The Scripps family is going around California having as many illegitimate children as possible in the hopes that one of the children will be the Kublai Khan of the 21st century. I am not making this shit up. By putting so many men into prison for free, the state of California is now focusing on putting as many women it can into prison for free. California pays for

incarceration via social security, Medicaid and Medicare tax deductions. The state is looking to put men and women in prison who have chronic disease so that it can be quickly reimbursed by federal transfer payments.

Our nation brainwashes women via the Russian fairytales of Snow White, Sleeping Beauty and also Cinderella. By obfuscating divorce and the glorification of postpartum deaths in these simpleton fairytales, the Russians have been able to brainwash millions of women in America. Our women are convinced from bogus children's stories that "princes" are waiting for them.

Boys are convinced from these same texts to pursue vanity in the hopes of meeting a damsel in distress who will respect them because they are wealthy and capable. These fairytales in capitalist societies reinforce the sense of self created by bogus religions and pharmacological psychology.

Such societies create the concept of self that forces children to work for decades for wealth that is confiscated by the aristocracy either via consumption or epic financial collapse. Marriage is routinely undermined by the perfidious forces of capitalism. The truth about families in America would shock you, the reader. The vast majority of us in America are poor. At this moment in our nation, 60% of our families do not have the ability to survive job loss without welfare and food assistance.

Women are in the same boat as men. Both sexes are fed flotsam about the labor markets. Nowhere does it say that the majority of executives in America got their jobs via nepotism. Teachers in our public schools and professors in our universities are forbidden to mention the word. Nepotism is the primary source of wealth, opportunity and education in America. This was true in 1676, 1776, 1876, and also 1976. It is normal to say that it will be true in 2076. It is true in all nations, especially the Far East. Russia, when it was the USSR, moved nepotism into the Communist Party. Now that communism has ended in Russia, it now resides under the aegis of the oligarchical family trees.

Nothing has changed in Russia since communism ended except for the massive rise of prostitution as a gainful occupation for women. Millions of women in Russia are now employed as prostitutes. It is a lucrative business.

By destroying the self during the communist era, Russia lacks women who have a sense of self to form family units. A Russian form of capitalism will spread as the ruling class's new economic regime. This will permit lucrative

cabals to form with insurance companies, organized religion and corrupt constables. These cabals will look for sexual deviants who will then form the vast network of perverts and molesters. Their job will be to penetrate schools, school districts and school authorities to create vast systems of child molestation and child pornography. It is done regularly in America. Why would it not happen in Russia?

The distress and anxiety of children causes extreme mood swings in their mothers. **Women view their children as report cards of their own lives.** By not revealing this to men, nations create the endless cycle of divorce. As the Russian form of capitalism spreads, children will be inundated with all types of educational and psychological requirements that few parents, except the very wealthy, can ever fulfill. As inadequacy grows, the Russian female will first go to vodka, then to street dealer quaaludes, and then to prescription antidepressants. **The number one side effect of antidepressants is divorce.** Then to divorce. Eventually, the divorcee will come into the grips of street heroin and will be convinced by her shit talking boyfriend to enter the swinging lifestyle. Then she will go to orgies with him. And, finally as a heroin-addicted woman, she will resort to prostitution.

Capitalism is a funny system. **It cannot exist without prostitution.** And whoring cannot exist without heroin. Heroin and the resultant extortion of naive johns is the basis of all organized crime since time memorial. The movie "Secrets of A Married Man" broadcast on television decades ago shows the travails of a man suffering through deep Freudian psychosexual animus.

As his children get older, he is shocked and dismayed that his wife is spending time raising them. With teenage children in the house, he has become addicted to pornography from the West Coast, where voluptuous women scream in ecstasy in the dark and hurl dirty sex talk at their lover. The title character wonders why his wife doesn't talk to him like that during their lovemaking. He withdraws from touching and talking to her. His need for fulfillment and adulation is fed with street prostitution. There, he falls for a hooker who beguiles him with a tale of woe straight out of our nation's cliché-filled romance novels. She was poor and taken advantage of by a merciless pimp. Then the john starts giving her extra money to protect her. When he tries to cut off the money, her pimp threatens to kill her. You can imagine the rest. Every day, in American cities, it goes on.

Whoring has been in our cities since the founding of the original 13 colonies. Prostitution is the bedrock of organized crime for thousands of years. It is the basis by which the ruling class's intelligence agencies gather damning evidence to blackmail politicians, judges, district attorneys, movie stars, entertainers and businessmen. You would be amazed at how many rich men want to sleep with children. It is done in every country on planet earth and dealt with by every police station.

Vladimir Putin, with his genius, will create a Russian type of marriage. A Russian type of organized crime. A Russian type of prostitution. And a Russian type of extortion. There is no need to create a Russian type of murder. The Russians are pretty good at murder.

Murder is one of the few things Russia is good at. Maybe in the whorehouses there will be bottles of radioactive polonium 210 to slip into the john's vodka. Or maybe the FSB will direct a wonderful and theatrical murder-suicide with butchered limbs and severed heads to "send a message". Russia is filled with part-time artists in the murder trade. Who knows what will be manufactured at a crime scene to scare the living shit out of average people?

Capitalism in Russia will require lots of heroin. Not only for addicts but also for the prostitutes. Maybe Russia will manufacture fentanyl as an ersatz substitute. New York City, my home town, currently has 600,000 whores. Imagine how many whores will be in Moscow by the year 2100. The beauty of Russian fairytales and also Arthur Miller's "Death of A Salesman" is that they convince children and teenage girls that magic, messiahs and *mahdis* will make them rich one day. All of these books look down on human effort and industry. Our children are taught everyday by teachers and professors to worship wealth, inheritance and nepotism; what else would anyone expect in a nation filled with children whose mothers are street whores. In America, our universities cater to the planet's aristocracy. They are no longer passing or creating knowledge.

How will Russia create 1,000,000 whores to take care of the sexual needs of Muscovy deviants? It is easy. First, reintroduce Russian fairytales that worship the ruling class, inheritance and the bogus Christian messiah. Then as they reach their sexual maturity, force them to read books like "Death Of A Salesman" to convince them that marriage to a loving man is worthless and pointless.

Once Russia convinces women to view marriage as worthless, it can then convince men that homosexuality and transgenderism will enable them to be masters of the universe. This is the secret to maintaining the vast oligarchy that the Kremlin has emplaced long after Vladimir Putin has died. The WASP aristocracy in the United States has already manufactured 7.25 million transgendered women to assist in the future administration of WASP power when racially superior biological WASP women take over our nation from feeble white men.

Of course, winnable wars need to be planned. This keeps a steady stream of refugees coming to Russian cities. The memories of the despair of war and lost families will drive these refugees to use heroin and to become addicted. As their war trodden men become addicted to heroin, women will need to turn to prostitution to feed their children. Once the cycle of prostitution and heroin are permanently emplaced, Russia can plan the vast lucrative off shore tax shelters that will create the "ladies that do lunch" circuit of the West.

Tax cheats in New York City would pay \$435 for pasta prima vera in posh eateries. This is a peasant dish that cost's restaurants less than \$3 per person to make (pasta, egg, vinegar, seasonal vegetables, garlic and onion, chicken stock, oil and salt). Not a single Treasury or IRS agent was allowed to investigate the people who bought this type of meal (the high cost of it should have been seen as a red flag for a bribe) or restaurants who served them (nothing but Swiss bank run ATMs) as Senator Daniel Patrick Moynihan and Congressman Charlie Rangel would deter the investigations. At these meals, waiters would give customers cashier's checks or prepaid debit cards hidden in their menus. This technique of tax avoidance and "withdrawals" was done for decades in plain sight in NYC. **DECADES!**

A series of winnable wars have to be fought by Russia against barely clothed, dark skinned peasants who fight with shovels and broken axe handles against tanks, like we do in America. Who in America doesn't recall the naked Vietnamese girl running in the street with second degree napalm burns all over her pussy from a vicious US Air Force assault or the peasant Guatemalan children stabbed to death in front of their mothers? Russians will need to be as tough as we are.

Refugees will then become immigrants to the shit cities of Russia where they will be taunted for their dark skin. Depressed, these aliens to a foreign land will buy the street heroin brought into Russia by their own ethnic organized

crime families. Then, their children, years into the future, will join organized crime and become the prostitutes and pimps of the land. This is what we do every day in money making America. Land of the lost. To create a Russian form of capitalism, maybe incurable disease and STDs will be used to create the endless medical expense we have in America.

Communism created endless divorce by destroying the self. As capitalism dominates Russian economic thought again, divorce will again become a social disease that is created by the establishment of the self by religion and psychology. With divorce, Russia will create the endless demand for heroin and also diamonds. Ultimately, the FSB and Kremlin will create a sea of prostitutes, male and female. The end result will be a lucrative supply of patients for hospitals and a profitable trade in diamonds.

Chapter 8: Healthcare

Russia's GDP growth this decade will be spectacular. With nearly \$75,000 per capita GDP by 2030, Russia is looking at growth similar to Japan and Saudi Arabia in the 1980's. The biggest beneficiary of this increase in wealth will be the Russian people. High quality healthcare will be an immediate result. Dental care in Russia, however, will improve dramatically. New equipment, new anesthesia techniques and new training methodologies will improve medical care.

Will Russia create the massive concentration camp system of the United States to create wealth for its suburban residents? That remains to be seen. Russia has not had the prolonged era of depression that the USA had. As the USA built its massive empire, it had to hide the effect on the US economy of German, Japanese, South Korean and Taiwanese manufacturing integration into the global economy. Unlike the depression of the 1930's, the USA could only survive by making sure all of the economic degradation fell on minorities. This was easy to do as the *Miranda v. Arizona* ruling from the Supreme Court of The United States helped our nation invigorate, professionalize and corporatize organized crime.

Organized crime for decades in this country were petty loan sharks, pimps and third-rate hoodlums. With their participation in the brutal assassination of John F. Kennedy, organized crime was given the green light to sell cocaine and expand into gambling casinos in Reno and Las Vegas. Prostitution moved from the street corner and became the escort business. The mafia moved into hotels where the staff were all prostitutes catering to the homosexual businessman, the emerging lesbian businesswoman and the male sexual deviant. Prostitution and gambling continued to enable organize crime to enter the home run derby of extortion where business executives could be black mailed for common stock earnings tips and also patent filings.

The mafia's growth from the Presidency of Lyndon Johnson to President James Earl Carter's administration looks like a tangent curve. It was unprecedented in the history of the United States. Cocaine and heroin trafficking became a multi-trillion dollar industry. It became so lucrative that the FBI and the CIA protected the mafia from being prosecuted. Furthermore, the US military started to protect cocaine trafficking.

California became the first state in the union to actively portray slum dwelling negroes, illiterate and barbaric, as the ring leaders of this massive industry. The criminal Paul Castellano even grew so brazen as to build a house that looked like the White House in Staten Island, my home town. The Italians, encouraged by their Pope, extorted the United States via extensive video recordings of its homosexual Congress members, homosexual judges and the homosexual Presidents.

The mafia soon learned of the massive wealth coming to hospitals from HIV patients. HIV was incurable. Hospitals dispensed salt and sugar pills as well as aerosolized water to treat the illness. These medicines were charged to healthcare insurance companies from \$10,000 a week to almost \$50,000 a week. A gold mine!

They looked to enter medical care on a massive footing. By taking over all the unions that administer and maintain universities, the Sicilian mafia thugs hoped to become like the Northern Piedmont scum of Italy who ruled and controlled all intellectual thought in Italy. The Piedmont Italians control who gets into college, who becomes bishop and cardinal in the Roman Catholic faith and has massive power over the illiterate and uneducated Catholic masses.

It was the goal of the Sicilians to take over the United States. They started making massive donations to medical centers. Massive charitable contributions will get you on the Boards of Directors of many of these hospitals. So lucrative were gambling, prostitution and drug trafficking that the mafia soon entered healthcare. Today, America's leading medical centers are controlled by organized crime. Many are owned by them as well.

The mafia's power in America is largely due to the massive racism of the West Coast elite. California, Washington and even Oregon were very poor and filled with large farms up until 1984. It was in the 1980's that massive wealth effects of affirmative incarceration started coming to the surface. The Reagan Administration and organized religion worked hand in hand with Fannie Mae and Freddie Mac to make suburban home values increase dramatically. The only way they could do that was to militarize the police departments of the urban slums.

For decades, petty negro drug dealers used .22 caliber guns and sawed-off hunting rifles to defend their drug territories. Soon organized crime started selling high powered automatic pistols as well as small semi-automatic guns

to these entrepreneurs. The whole purpose of this warfare was to drive whites to the suburban tract homes fifty to one hundred miles out of the city. The SAT® was dumbed down in these caucasian zip codes. The ensuing mass migration of white citizens rapidly increased home values in these outlying areas and created the illusion of social progress.

Ronald Reagan's buddy, George Bush, made sure the Carter Administration, did everything to bungle all of its foreign policy initiatives. Social policies like school integration and affirmative action were countermanded by aggressive policing. Ronald Reagan made a fortune bringing cocaine into urban slums. He did so much to maintain and expand white supremacy via cocaine trafficking that the Queen of England gave him a special medal after he left the White House.

Will Russia circumcise all of its boys so they can get autism? Will Russia fill its cities with cocaine and crack to build wealth for suburban residents? Will Russia fill its cities with fluoridated water so all the kids will have ADHD and mental health problems? Will Russia have the deep mental health problems we have so that its adults need brain surgery? I really do not know. People have a false sense of healthcare. Hospitals really do not cure people of anything.

The massive GDP growth Russia is entering will result in mass produced goods and associated health problems. Animal protein consumption, especially beef and pork, will result in increased heart disease and circulation problems. Many of the health problems Russia faces can easily be solved. Statins have come off patent. Many of these new-fangled drugs for weight loss will be off patent next decade.

Russia has one problem it can easily solve. The long winters in Russia cause depression and mass consumption may help reduce that. L-tryptophan based diets are easy to replicate. Russia has capable neighbors (Mongolia, India, China, Taiwan, Japan and Korea) who all have abundant carbohydrates to export. Viet Nam has abundant fish. South Africa, Kenya, Tanzania and Uganda, when properly managed, can produce incredible agriculture yields in all animal proteins.

Healthcare equipment and techniques are a function of money. The United States created Medicaid and Medicare to make state prisons easy to finance. Why else are these programs in existence? None of the healthcare

programs in America help ordinary people. They help prisoners survive while incarcerated, enabling physicians to become billionaires.

All health insurance hides the massive healthcare that goes to executives. The American diet is filled with alcohol, cocaine, heroin, methamphetamines, acetaminophen, barbiturates, cholesterol, white sugar, hormone treated milk, lead, massive preservatives and endless salt. All of this is used to subsidize the costs of the massive prison population we have. When births decline in this nation like they did in Japan, we will run out of children to incarcerate.

Will Russia do what we did? I do not know. Greed has a way to change everyone. A lot of Americans are actually healthy. They just do not want to change their ways.

Russia needs to increase live births. That is really up to the women in Russia. Once they come to an understanding of their self, they will seek advantage. Russia, as a nation, has done a lot to increase live births. So has all of Europe. Except the United States, China, Viet Nam and India, no one has succeeded. The current generation of children, planet wide, are addicted to blue screens. With so many girls and women using intra uterine devices for contraception, few women have the psychological pressure even to marry. This is cultural. As the nation expands l-tryptophan ingestion, mass psychology and mass media will create magic; a massive birth boom.

Chapter 9: Education

We are celebrating a wonderful era in American history. Close to 75,000,000 American men have a criminal record. This was done to enable WASP women from the upper class to enter the professions, to become elected representatives and to be the leadership class when our octogenarian WASP gentry enter the next stage of existence. To effect WASP supremacy, there has to be a vast system of education. During that process of education, individuals must be given report cards that hide society's true evaluations and assessments. Parents throughout America do not know how our system of education works. The whole purpose of the system is to drive minorities into high stress careers where the vast majority of their income goes to income taxes, consumption and housing. The end goal of our employment system is deep mental health problems and physical disability.

How can I say this? For decades, I have been working with kids with great success. I used meta-analysis and statistical inference to see why certain kids did well with me. I found out that I was very successful with wealthy kids. The system I developed, IVY Verbal Review, works well with wealthy kids. But that is true for all education.

Education works with wealthy kids. It is very hard to teach poor kids. They leave the schools and go back to the destructive environment of the impoverished home, malnutrition, the broken family and the urban slum. I routinely tell people the truth, that I am not a good instructor; all I do is teach rich children. Southern Company only promotes rich children. Goldman Sachs only hires rich children. America's racist all white law firms only hire rich children. IBM only hires rich children. It is the truth.

No white family in America will tolerate a merit based society. America is a nation of nearly 320,000,000 plus white people. I lived in the deep South and I was shocked at the bigotry, racism and systematic white supremacy that existed there. The federal security services as well as local law enforcement enforced racial stratification. The State Department and Justice Department enforced broad racial bigotry. Foreign countries, especially Japan and Europe, came to the South because of its bigotry. The South and its racists are integrated with Skull & Bones, Tail Hook, Jim Crow, Opus Dei, Society of Jesus, Sons of Cincinnati, Ku Klux Klan, US Golf, etc... These are white supremacist organizations and they work with Perot Medical Systems and IBM to jerry rig the schools and college admissions to make sure morons, idiots

and outright fools go to university. The Roman Catholic Church works with the dioceses throughout the South to make sure the lives of minorities are filled with havoc. It is like living in the 1830's. The racist system is administered by an *al queda* like entity called "The Machine".

When I heard the name, The Machine, I immediately said "IBM and university mainframes". Then I went to the school district and county level. Then I went to the state level. Prior to the year 2000, southern states were all run by IBM mainframes. Every single state. Why are IBM mainframes important? Because of DB software. IBM means the Roman Catholic Church. H. Ross Perot was a star salesman for IBM. He would sell his entire year's quota in less than month.

In his younger days, as a naval officer, Perot became aware of a coding system that the US Navy developed to identify their personnel's race, birth dates and latitude of birth. This was a cipher; a code. The military utilized this cipher to formulate computer horoscopes. The US Navy used this code and based all future promotions on horoscopes. He soon tipped off administrators of southern universities and southern municipalities that they would have to integrate their work force and he would show them how to use IBM mainframes to circumvent the Civil Rights Act. To sell as many computers as he had, he had to have an edge. And his edge was that he knew the Social Security number code.

They could use the social security number to identify "troublesome" employees and not hire them. By troublesome, he meant those who had high aptitudes and high ambition. These were also the employees most likely to start a family and have children. This is why for decades after the social policies of the War on Poverty started, southern cities and southern states were as dumb as shit.

IBM, the Roman Catholic Church and Perot Medical Systems working with Jim Crow Jews and all white law firms made sure that the feeble minded, the moron and the idiot would only have careers and children. Perot's system is utilized to this day by major corporations to maintain the American caste system. Just ask Cravath, Swaine & Moore. The current social security numerical code violates the Civil Rights Act.

Selling to southern universities, southern enterprises and southern hospitals. H. Ross Perot is often portrayed as a great salesman. He is

not. Anyone selling water in a desert will have a lucrative franchise. The Machine was selling water in the desert. Afraid of the Civil Rights Act, based on H. Ross Perot's tips, southern corporations bought IBM mainframes and installed DB software.

The cipher was installed on the Read Only Memory (ROM) hard drive. The drive about the size of a garbage can had a metal cylinder that had the cipher inlaid in it. H. Ross Perot, the US Navy and IBM worked together with Lyndon Johnson and the Jim Crow Jews to institute caste in the United States.

All of the South's universities and hospitals were run by IBM machines. They too participated in the Machine; only accepting black fools and imbeciles into their programs. All of these organizations worked together in an *al queda* matrix formation called the Machine. The Machine prevented capable blacks from getting employment from the passing of the Civil Rights Act until 2020.

H. Ross Perot was a bigot, a racist and a white supremacist. Unbeknownst to everyone but the Jim Crow Jews, he was America's largest private investor in municipal bonds. He was, until his death, the largest owner of municipal bonds in America. He owned more municipal debt than Wilbur Rockefeller. From many cities, he bought the entire municipal issue. In the South, that means bond purchases of \$5,000,000 to \$35,000,000.

Cities in the South are small and have rural tax bases as they have little enterprise. These purchases gave him insight and knowledge about the city's future, its planning process, its public school enrollment and its employment practices. He also would get the list of social security numbers of all the school's students. Perot worked very hard to prevent minority children because of their O- blood type, chromosomes and horoscopes from getting access to schooling, housing, employment, scholarships and healthcare.

From the vantage point of an aristocrat, he would use his influence to tell municipalities whom to hire, promote and give pensions to. He would tell cities and states whom to fire so the individual could not have children or the individual would get divorced. For a generation, black children were illiterate, innumerate, impoverished, unhealthy and poor with no intention of Southern states to educate them. Our nation found out from me that he was doing this.

As Russia emplaces capitalism into its society, it will focus on revitalizing its educational system. It has ours to copy. No system on this planet has ever

created the level of criminality, rape, murder and incarceration that the American public school system has. Not even imperial France or the Roman Empire.

We have a wonderful cradle to prison education system. The best on the planet. Russia, like America, has a fabulous system of divorce that occurs around the education of children. In America, white mothers are terrified of letting their kids attend schools with even three black children. Integration failed in America because it induced so much divorce in white families over child rearing. Women throughout America leave their husbands if they cannot put their children into all white schools. Throughout America, all white schools teach white children they can grow up and be President. Absolute bullshit. Just ask William Jefferson Clinton.

No one in Russia believes they will be President. They have no relatives in the FSB. Even fewer have relatives who are officers in the military. Even fewer have relatives that are the concubines or homosexual lovers of the second tier oligarchy. The nation needs to increase beef and milk consumption to replicate our nation's post code envy and delusions of grandeur.

Russia, although a rich country, does not believe in passing on that wealth to its citizenry. The black market is disappearing but it has been replaced with high cost, free market goods. Far beyond the reach of the average Russian. Today. But tomorrow is not that far away. **Russia is booming!**

Russia's GDP will soon be \$75,000 per capita. The far reaches of Russia will need millions of workers as it builds out the vast petroleum and natural gas fields under the tundra. Soldiers and sailors will need to be recruited to occupy the new military bases that need to be built along two thousand miles of the northern border.

The S-400 system batteries and nuclear arsenal need to be shifted to the northern border. As Chinese ship traffic moves toward Vladivostok via the Northwest Passage, expect a dramatic decline in ship traffic around the Cape of Good Hope and through the Straits of Malacca. Oil traffic will go through the Northwest Passage, enabling the Chinese Navy to focus its warships closer to its mainland as opposed to massive patrols of the Indian Ocean and the Arabian Sea.

Russia will also see massive development in West Bengal. Its industrial corporations will take part in the development of India into an industrial powerhouse. As India sheds decades of sycophancy towards the Nobel Prize and sees billions of rupees in revenues from synergies between Chinese hardware and Indian software, record revenues will be met by enterprises on both sides. The end of the handheld telephone will also result in massive change in the Far East.

The United States built a massive prison system to hide the deflation associated with integrating Germany, Japan, South Korea and Taiwan into the global economy. And it spent trillions fighting the messianic USSR. The Jim Crow Jews of America worked together and made a fortune firing blacks and destroying their retirement health care and fully funded pensions.

After our nation finished decimating the Negro population, its entire goal is to start incarcerating and decimating the caucasian majority. Our country has been incredibly successful at it. After the 9/11 detonations, the military and law enforcement nationwide quintupled its salaries. Many are paid overtime to never solve cases. In New York City, police officers can make \$500,000 per annum. They control the city. They view mayors as "expendable".

American parents are just encountering AI and have no idea what it is. None have even seen it. AI will devastate American employment. AI will devastate Indian outsourcing. India, however, will change. India, for the first time in its post-independence history, is moving toward a capitalist outlook. What is needed for this outlook is a revival of entrepreneurial effort and a decline in population growth. Both will come as AI advances in India. AI will end computer programming as we know it. India will shift toward transforming their electric utilities and their natural gas grids.

India's birthrate will systematically collapse as leisure takes hold as an industry. Leisure will result in a thriving hospitality system. It will result in a growing labor market for high school graduates. Birth rate declines will come with higher incomes and the use of the morning after pill and also intra uterine devices. It is already happening. *Immortalis* is widely practiced in India and it will continue to thrive there.

Russia has the opposite problem of India. It has to create an environment where men and women develop the psychosocial security to get married. It is not as difficult as it sounds. Once Russians feel comfortable with the new

academic needs of the nation's school system, they will take the steps to form family units and have children. All nations are the same. Few of us know how to rear children and to help them develop. No matter where you go on this planet, including the bush, no one wants to rear children.

All societies are the same. Civilization has not changed much. Each society on this planet has different goals for its children than the parents do. The Russian form of capitalism will create a Russian form of education. Russia already produces great academics, artists, writers, musicians, scientists, etc... But it has to find a way for these individuals to make intellectual contributions that will become commercial product. This is easier than it sounds. First, it has to have a Uniform Commercial Code (a system of basic transaction laws) to protect private property. The country is well on its way there. Secondly, it has to have a system of copyright and patents. Thirdly, it has to develop a system of litigation. Finally, it has to develop a system of trade secrets that enables industry to protect itself. All of these steps were evident in the development of the S-400 weapon system. No one in the West has figured this anti-ballistic missile system out.

The hallmark of all educational systems is the establishment of a court system. As Russia modifies its courts to adapt to capitalism, sea change will occur. This will take thuggery out of the streets and put it into a court room. Russia has plenty of experience with lawyers and lawyering. The next step is to get the citizenry to trust the capitalist system. This will occur as prosperity returns and individuals make entrepreneurial effort.

As Russian private industry expands, payroll tax systems and pension systems get strengthened. As farmers and agribusiness deal with routine demand, farm systems and farm labor can be forecasted. As industrial and agricultural demand becomes predictable, cities, republics and regions can formulate five year plans. As Russia develops its own form of democracy, it will emplace the steps toward family formation which will foment children. To create births is easy. In Russia, every woman wants a beautiful white baby boy. All it takes is one beautiful Russian baby boy to create an avalanche of births. The sight of that child will make women yearn. It is normal.

Will Russia create a public school system like we have in the United States that creates criminals, prostitutes, child molesters, kidnappers, rapists and murderers? I have no idea. I do not run Russia.

Chapter 10: The Elderly

Russia faces the same aging issues that all countries face. She has to create hospices and clinics to assist the vast number of elderly. But unlike past eras, Russia will see a massive increase in income. The Northwest Passage to Asia will lead to an increase of trillions of rubles in GDP as Russia has over three thousand miles of border along the route. Thanks to massive deforestation in Brazil, India, Africa and China, entire swaths of tundra will disappear into the Arctic Ocean.

It remains to be seen if Hollywood will create elaborate AI effects in movies of massive mile high tidal waves enveloping the planet to scare the shit out of its audience. Absent propaganda from the West, Russia is looking at achieving an \$18 trillion GDP by 2050. A spectacular increase in wealth!

The vast majority of the elderly receive incredibly small pensions. From the current projections of Russian industry, the nation should be able to pay these with little difficulty. Will Russia increase allotments to the elderly down the road? I doubt it. The Russians have a long history of supporting the elderly with basic necessities. The siege of St. Petersburg is taught in Russian high schools and it is still in some citizens' memories. Thus, the nation will provide basic food rations, basic healthcare and some basic eldercare services such as a recreation facility. That is it.

Capitalism brings its own problems. Plastic surgery has come to Russia. Russians have started to bleach their anus. The HMO has come to Russia. So has an endless sea of medical professionals and elder care advocates. But the "flying doctors" of the COVID epidemic reveals to me that few physicians in Russia will ever get the hysterical power they have in our nation. Medicaid and Medicare, in our nation, has largely funded the growth of our prison system. Today, the United States has the largest prison system on Earth, entirely funded by social security, Medicaid and Medicare contributions by the tax payer. Americans love prisons because it does not appear in their property tax payments of income taxes. Politicians hide the payments for prisons in mandatory payments for social security, Medicaid and Medicare. Our prison system is larger than Russia, China and India's prison systems combined. By not segregating prisoner healthcare from the civilian population's health expenditures, Americans are convinced the government is trying to help its citizens.

Russia had a bad experience with patent medicine prior to the Revolution of 1917. Most Americans do not know that nearly all doctors in Russia were incarcerated or executed during the Russian Revolution. Our textbooks and history books are not permitted to detail why thousands of doctors were murdered. The one's who lived, fled the country during the early days of the Revolution.

When you see the despicable aspects of American medicine where simple cures are outlawed and the legislature is entirely controlled by large medical providers, you will see why Russia refuses to raise medicine to the level of God.

American medicine is easy to understand. Whites will pay fortunes to be in an all white hospital. Large corporations poison American children. Their biotech investments create the patent medicines that are sold to us at exorbitant rates. The process is simply detailed in "The Pearl" by John Steinbeck.

For decades, America's education system has been promoting retards, morons, the dyslexic and certifiable idiots into its top universities. I CAN PROVE THIS IN ANY COURT OF THE LAND. Just like Europe does. This has resulted in fewer cures and scientific break throughs. Working with H. Ross Perot and secret societies (for example, Skull & Bones and Jim Crow to name just two of dozens in our country), America's largest corporations instituted Islamic caste, just like India did in the first millennia. H. Ross Perot for decades provided hundreds of multi-billion dollar corporations and universities throughout the United States horoscopes on their employees enabling companies to fire O- blood types and making sure they never have the financial resources to get married or to have children.

The USA has hid a simple truth from its people, a smart child comes from a male with A+ blood and a female with O- blood, Aptitudes in the deep South have not increased since the Civil Rights Act was passed because O-blood type females cannot find husbands. This way the WASP leadership class, via its secret societies, could maintain low IQ's throughout the nation and hold onto legislative power for another generation.

In fact, any disinterested observer would state the obvious, that **Lyndon B. Johnson was a motherfucking liar.** Clearly, based on the facts, there was no Civil Rights Act and there was no War on Poverty. H. Ross Perot made a fortune when the hypocrite William Jefferson Clinton was President as

well. This example again proves the validity of the **Tom Mathew postulate**. In a civilization, the ruling class denies all rights of citizenship to the citizenry to maintain their hold on power.

But capitalism in Russia brings its own problems. Incomes increase. Tastes change. Wrinkles! Grey hair! Diets change. Cellulite! Baldness! Plutocrats have weak kneed children. L-tryptophan and melatonin are needed to maintain the delusion of messiahs and fairy god mothers. Legislatures change. Kleptocracy rises. Politicians can be influenced. Religion can have a say. In the end, new leadership may be more amenable to changes in Russian health care practices. Furthermore, the younger generation looks at the endless panaceas of the West and wishes for salt pills too.

Under the current regime, outside of premium care services available to the aristocracy, there will be no changes in Russian healthcare. Wealthy patients can fly to West Germany or to America and get care. Many nations, Estonia, Sweden and Finland for example, can offer care as long as people pay. As Russia's economy expands dramatically, these countries will soon take rubles. Rubles were taken for centuries in Europe. Rubles will soon erase wrinkles as Russian doctors become bullshit plastic surgeons.

Will Russia make the same mistake of Staten Island, USA? Staten Island has more cardiologists than all of Canada. One county in America! There is no healthcare in America. Just hysteria and endless prisons to be financed. Will Russia spread HIV and STD's so doctors can increase their revenues from 20 to 40 year old patients? I do not know. Only idiots spread a disease that can be cured. HIV is 100% curable and preventable. When you place retards into your science labs, you will get retarded science!

Clearly, incomes and lifespans will increase in Russia. This will result in some adjustments to statistics. But the rise in GDP will mean the current generation will easily live into their 70's and 80's. This will result in changes to healthcare and ultimately, care for the elderly. Not today. Nor tomorrow. But very likely in the years after 2040.

Chapter 11: Freedom

Freedom is a ridiculous word. The great yogis have utilized *maya* and *karma* to describe the endless failure of homo sapiens. Science has endlessly talked about enzymes and chemicals controlling our everyday movement. From L-tryptophan, melatonin all the way to lysine and ascorbic acid. And then there is the reality of the United States. Our nation is easy to analyze as long as you are expert in deciphering direction in a nebula from a far different galaxy. From the pancake-like universe we live in to the ridiculous global maps where continents are resized to make sure we are the biggest country on the planet. As other nations surpass us in wealth and power, it is just a matter of time that maps will be redrawn to show that we are just a small country with far less land and populace than them.

Seven countries terrorize the average American. They are:

Netherlands

Italy

Germany

Guyana

England

Rotterdam

Switzerland

These countries work with the FBI, CIA, NSA and military intelligence agencies to destroy people's lives in the United States. They provide data to corporate intelligence agencies who work with private contractors to destroy your career, car, home and health. They will file frivolous law suits to agitate you. Wreck your car in parking lots. Make sure to come and illegally examine your private parts in hospitals. Switch drugs during operations or mess with your prescriptions. Their agents pose as normal middle-class people in suburban neighborhoods. Their agents may be your waiter or your maid or your taxi driver. What looks like a series of unfortunate events are really coordinated moments in your life to cause havoc.

These nations utilize illegal wire taps and illegal surveillance to damage an individual's reputation and position in her community. Much of it is done by utilizing satellites and computer-generated horoscopes. By hiding behind intelligence agencies, these nations tactics cannot be detected by the local police; they do not have the tools or the legal authority. By hiding behind organized religion, these nations avoid prosecution. By hiding behind organized crime, they have the means and ability to escalate their harassment to include violence and potentially murder. Many of these countries launder the massive cash flows of the narcotraffickers in the United States in similar maneuvers to the Liechtenstein tax maneuver. Narcotrafficking is close to a \$30 trillion industry in the United States. Our Presidents have made millions personally from narcotrafficking. The key to their success has always been to blame all drug dealing on illegal aliens and worthless residents of our nation's urban slums.

As Russia reemerges over the next two decades as a capitalist country, it will have to find a way to protect narcotraffickers from criminal prosecution, like we do in freedom loving America. The Kremlin will need to have to manufacture jurist cases like *Miranda v. Arizona* which will legitimize a group of third rate criminal lawyers and enable narcotraffickers to argue that they are protected under the laws of Russia against harassment by the state.

Organized crime in our freedom loving country went from hustling pimps and whores to terrorizing massive enterprise via its control of Roman Catholic unions. In our country, *Miranda* enabled organized crime to corporatize and file legal tax returns. Russia will need to create *al queda*-like professional organizations like Skull & Bones and Jim Crow. Also Russia will have to create murderous religious orders like the Society of Jesus which has never been prosecuted for murder. No one in the history of our nation has been prosecuted for *Immortalis*.

Freedom of the press in America has been reduced dramatically by the internet age. Press freedoms were in decline starting with Ronald Reagan as president. This was largely due to the Liechtenstein Tax Maneuver. With \$63 trillion hiding in Swiss bank accounts, no one in the aristocracy would be standing up to the vast steps taken by its own members to implement Islamic caste in America. Prominent Roman Catholic newspaper reporters, artists, poets and authors were taking part in the Liechtenstein Tax Maneuver. The word "conservative" in America is a fancy word for Catholic. Liberal, by the

way, is a fancy word for Jew. They would shoot down any outcries of racism and bigotry in America. According to these tax dodging hypocrites, America is full of opportunity. In fact, many of the liberals stating that there is racism in America were also taking part in tax evasion too. Vanity, alas, in all nations and cultures is created the same way, with Swiss bankers.

The arguments between conservatives and liberals in America read like the complex passages in the four gospels validating Christ's omnipotence and power that are incomprehensible to laymen. In popular television news shows, the conservatives would yell and scream at the liberals. Both would speak absolute nonsense. Often both sides were holding Liechtenstein tax accounts. It was similar to the Swiss account holding Ronald Reagan arguing with the Swiss account holding Leonid Brezhnev or the Swiss account holding Jawaharlal Nehru arguing with the Swiss account holding Muhammad Ali Jinnah. In many of the global conflicts that we witness in the news, both sides have Swiss bank accounts. Why would the super rich kill each other? Nuclear war, in my opinion, is impossible as both aristocratic sides have the same banker. Who will bomb the super rich's bankers?

To get on tv and to get in newspapers, you have to pay cash bribe donations to the press and to broadcasters. It is done every day. Easy to do if you have cash in foreign accounts or if you are very wealthy. Public relations in America, like advertising, takes money. Cash money, placed in envelopes to editors and television producers, are then transported via courier or wire transfer into Swiss bank accounts. UBS in New York wire transfers millions of dollars every day from New York City to Switzerland. There are just numbers on paper receipts for the account transfers. It may be suspect, but it is not illegal. Credit Suisse, prior to its bankruptcy, did the same. There is no law to prosecute these institutions in our country.

Russia will have to start working with other countries to create the same delusions of power, wealth and fame that enabled the American bourgeoisie to prosper. This is easy to do. As Russia engages in trade, it has to set up correspondent banking relationships with these countries. Soon, with cross immigration, Russia can also set up consulates where its former citizens now live. The need for visas to enter Russia can only be issued by these consulates. From these consulates, Russia can monitor neighborhoods to identify children who are born in the last zodiac sign. From here Russia can work with foreign allies and foreign intelligence agencies to terrorize them to leave their home country and immigrate to Russia.

Russia's rise in economic prowess is easy to project. Genetics, as opposed to education, is more predictive of its rise. The Kremlin is actively encouraging its former citizens to return as it needs their ancient genetics as well as their historical knowledge of capitalist Russia. Putin's Russia can assert something that few people in the West can assert; criticism is needed to maintain a democracy.

It was easy for America to implement Islamic caste once it consolidated the media within four families. Criticism is also needed in white democracies of those who believe in Jesus Christ. An intelligentsia is also needed so market capitalism can thrive. Otherwise, such a regime can become fascist. Also, the state will move from fascist to a despotic regime. Vladimir Putin is making sure that freedom in Russia is Muscovy in form.

Chapter 12: Art

America is a racist, bigoted white supremacist nation. Russia is also a racist, bigoted white supremacist nation. Common ideals and common values reveal that Russia and the United States are symbiotic nations. Russia permits O-blood type citizens to immigrate to the United States. By emplacing them into our federally funded whore houses, called universities, we create a new generation of A+/O- white children. These children will have the highest aptitudes.

Russia has always stated that it has a lot of power over the United States. And that is true. It is largely through the Jim Crow Jews that Russia exerts its power. It is not through the occult or through clairvoyance Russia has power. It is largely through art. Art is where Russia dominates. During the communist era of its history, the former USSR made it a habit of funding art and subsidizing art education. Although sports received more, art is where Russia got the most bang for its buck. Not only did Russians make masterpieces, but they created property for a property-less state. The conundrum was incredibly profitable.

Not even Don King could orchestrate the spectacles of Russian artists suddenly defecting to the West. Nor could Ed Sullivan achieve the impresario status without the amazing voice, ears, legs and fingers of visiting Russian artists. Which American man can deny the Muscovy beauty or the St. Petersburg gazelle gracing his music halls? Russians talk shit but few races are so beautiful talking absolute shit.

Russian art is a result of what we in the West call "God's grace". And that is the rub of all civilizations. Russia did not learn this overnight. Influenced by the Persians over centuries, the Germans, and of course the Hapsburgs as well as the Vatican and the Holy Roman Empire, Russia has created an oeuvre of creativity that is unparalleled in human creation. State craft has interfered in what is normal communications between the realms of the United States and Russia. But art continues to be made.

Art is the one field where Russian investment can be seen. And it is where Russia will always excel. The one thing this nation of Svengali's knows is to identify those incredible children and stoke them. Needle them. Push them. Until they become world class and perform on the world stage.

Voila, un chef d'oeuvre!

Artificial intelligence (AI) is a wonderful tool. In the hands of a neophyte, it is just another container of paint, a chisel, a triangle, or a sharpened pencil. While capitalism has penetrated Russia, it has not taken over all of the arts. There are still some bona fida leftists and anti-imperialists left in Russia's art world. And that is where AI tools will flourish. AI, when expertly used by the computer-literate master, can enhance art, music and dance. In Russia, these tools will create castles floating in the sky.

Russia's investment in the S-400 weapon system will provide additional security for its artists. From pre-school to primary school education to high school and university levels. As Russia prospers, Russia will dump money into the arts for its children. It is normal.

This book started with a massive explanation of what the S-400 system will do for Russia's economy. And showed you, the reader, how Henry VIII's improved cannon secured maritime superiority and wealth for two centuries. But look what the cannon did for English art. Look what it did for English literature and English music. And look what it did for English consumer goods. Thus, Russia's new weapon system will secure massive wealth. This new wealth will result in MASSIVE cultural influence. From China, to India, to Iran and beyond.

This book talked about how global warming spread due to Western deforestation. Global warming will enable Russia to identify and exploit new hydrocarbon resources on its own land. Then, I showed how rising hydrocarbon sales will lead to a rising prosperity in Russia. Then, I revealed how improvements in health care and women's liberation will result in increased psychosocial security for Russian women and children. With psychosocial security, comes increases in family formation and live births. As Russia moves forward on its own form of democracy, expect a leap forward in the arts.

As Russia enhances freedom for its citizens, it will witness an expansion in artistic output. The Jim Crow Jews of America will help new Russian artists get world renown. The Jim Crow Jews consists of the vast tribes of Jews that work with Russia to control the United States. We can see Russian influence in every museum and every concert hall in America. With the help of America's Jim Crow Jews, Russian composers and ballets are the standards of the

day. No "American" ballet or orchestral arrangement can be played. This shows the real power of Russia. And it shows that Russia really controls the United States.

Art is the real source of power in America. Because it influences the aristocracy. And the aristocrats control the Congress, the state legislatures and the courts. By controlling the Jim Crow Jews, Russia controls the artistic output of the nation. By making sure few if any artists are subsidized in their life journey to become an artist, the United States has ensured that Jews control the development of artists. With over four million Jews hiding their wealth in Switzerland via the Lichtenstein tax maneuver, Jews have become the major source of funding for struggling artists. Those who do not get into Jeffrey Epstein's harem can choose other Jewish impresarios harems to join. There are so many.

Outside of the art world, Jews have no power in the United States. Their toe hold in the art marketplace is welcomed in the United States elite power circles. Russia's influence in the American marketplace for art is meaningless. No matter how rich and powerful Jews get, they have zero power over the WASP gentry as can be seen by the massive white washing of the Jeffrey Epstein affair. It is sad but the outcome is easy to understand. Jews fail to understand even one percent of WASP power. There is only what "is", not what can be.

Russia is a messianic country. Thus, it is normal for Russia to ally with ethnic Ashkenazi Jews whom are messianic in their views as well. This messianic outlook permits the United States and Russia to be symbiotic in their outlook with respect to white supremacy. The goal of Russia is to enhance Russian artists position on the world stage. We, in America, are devout about our belief in white supremacy. Thus, the Jim Crow Jews are assisting the WASP leadership class to maintain the color line in the art world. Ashkenazis know that provenance through the vast circle of Jim Crow Jews is the only way for an artist to become renowned. William Paley's CBS and the Ochs-Sulzberger's *New York Times* and the Graham's *Washington Post* and *Boston Globe* affected the viewpoints of millions of Americans. These media outlets affect the few men and women, numbering less than 3,000, that influence the value of art in the marketplace.

Our art in America is garbage. It is incredibly Jewish. And incredibly Ashkenazi. All other art goes into some sort of ethnic palaver. And this plays

into Russia's subtle influence over the global art market. It will determine what will be *de rigueur* in the future. When you influence art, you influence the culture. And the culture then influences the power structure. And with power comes the ability to change the destiny of people's lives. And when you change the destiny of people's lives, like Russia does, you change the future of your country.

Chapter 13: Conclusion

It is impossible to analyze Russia using the rhetoric of national security or even the mathematics of GDP. The nation is impossible to understand. George Fredrickson in the twentieth century helped us understand the vast similarities between racist South Africa and racist America. The two civilizations are symbiotic to each other. Both nations at the time were mirror images of each other. The Russian Federation is easy to understand when you know the principles and mathematics of white supremacy. As a white supremacist nation, every aspect of Russia is easy to understand, project and analyze.

If you look at the United States as a white supremacist nation and look at Russia with the same logic and analytic methodology, you see two nations that are symbiotic. These two nations work together with Europe to make sure India is always running around like a street mutt chasing its tail. The recent war in Iran has completely sidelined India. With very little effort, India has been completely destabilized. India, for weeks, looked like it was run by absolute idiots.

Russians and the Americans work together to expand weapon sales to an ignorant India. In the end, both nations diminish India's growth and prosperity. In 1973, India's GDP matched South Korea. With Russia's help, India soon became absolutely destitute. In 2023, India was shining. Now, India looks like it will deteriorate rapidly with the help of its ally, the United States.

The symbiosis between Russia and the United States is easy to understand when you understand immigration. Russia allows its citizens who have O-blood to immigrate to the United States. Both nations then work to destabilize the immigrant population. Our nation has manufactured the proverbial "A" average in America's moron filled high schools. Endless platitudes for mediocrity are passed out throughout America. Athletic medals are being given to children who have no limbs. We have men wearing women's bathing suits pursuing the endless vanity of being number one. The delusions of grandeur in our nation are vast and deep. This is largely due to the high levels of protein and prosperity our nation enjoys. With so many suburbs and exurbs, everyone is convinced by bogus certificates and endless rankings to pay the high rate of taxes to maintain our vast military and prisons.

Russia by its language, food, music, art, clothing, architecture and military is a messianic culture. The nation will be ridiculously prosperous as it lacks large minority groups to incarcerate like we do in America. Our military faces the same old adversary but with new prosperity. America's success has largely been due to the fact that it does not allow O- blood types to have wives, children, health or any form of prosperity. This has gone on for 250 years. Russia is willing to let these anti-social people leave Russia. No one in America notices the sheer lack of O- blood type population in our nation. Most nations have at least twice the number of O- children we have.

The United States will never allow Russia to achieve its goals. Our nation by its very founding, culture, law and historical rhetoric is anti-messianic. Artificial intelligence is just the newest extension of the vast incarceration system we developed to deal with the Russian Federation's predecessor, the USSR. Our nation will stand up to Slavic contraction of the American way of life. The end result will be detente between the two nations.

Nothing has changed in 250 years in America. Nothing ever will.
